VOLUME 25 CONTENTS

Vol. 25, No. 1

E. R. Hitchin	1	Developments in degree-day methods of estimating energy use
P. T. Lewis and **D. K. Alexander**	7	HTB2: a flexible model for dynamic building simulation
U. Norlén	17	Estimating thermal parameters of outdoor test cells
A. E. Delsante	25	A comparison between measured and calculated heat losses through a slab-on-ground floor
M. Zaheer-uddin	33	Dynamic effects of thermal shutters
R. J. Cole	37	The effect of the surfaces enclosing atria on the daylight in adjacent spaces
P. J. Littlefair	43	Predicting annual lighting use in daylit buildings
M. J. Cunningham	55	Modelling of moisture transfer in structures—I. A description of a finite-difference nodal model
S. J. l'Anson and **W. D. Hoff**	63	Chemical injection remedial treatment for rising damp—II. Calculation of injection times
M. A. Salau and **L. A. Balogun**	71	Shear resistance of reinforced laterized concrete beams without shear reinforcement
F. Lasisi, J. A. Osunade and **A. O. Adewale**	77	Short-term studies on the durability of laterized concrete and laterite–cement mortars

Vol. 25, No. 2

M. J. Cunningham	85	Modelling of moisture transfer in structures—II. A comparison of a numerical model, an analytical model and some experimental results
R. Zmeureanu	95	Assessment of the energy savings due to the building retrofit
J. M. Penman	105	Second order system identification in the thermal response of a working school
A. A. Eberhard and **M. O'Donovan**	111	A critical review of the usefulness of microcomputer based design tools for passive solar design of low cost housing in developing countries
N. M. Bouchlaghem and **K. M. Letherman**	117	Numerical optimization applied to the thermal design of buildings
Y. Qin and **S. C. Kot**	125	Validation of computer modelling of vehicular exhaust dispersion near a tower block
A. Retik, A. Warszawski and **A. Banai**	133	The use of computer graphics as a scheduling tool
S. Hassid	143	Thermal bridges across multilayer walls: an integral approach
J. Skotte, N. O. Breum and **T. Schneider**	151	Improving an IR tracer gas analyser by digital filtering
M. R. Mokhtarzadeh-Dehghan, M. M. M. El Telbany and **A. J. Reynolds**	155	Transfer rates in single-sided ventilation
F. Haghighat, P. Fazio and **J. Rao**	163	A procedure for measurement of ventilation effectiveness in residential buildings

R. Fritsch, A. Kohler, M. Nygård-Ferguson and J.-L. Scartezzini 173 A stochastic model of user behaviour regarding ventilation

F. A. Ahmed, R. S. Al-Juruf, H. H. Abdel-Rehman and I. A. Alam 183 A homogeneous building material from date palm fronds

I. A. Meir 189 Monitoring two kibbutz houses in the Negev Desert

Vol. 25, No. 3

KNOWLEDGE-BASED EXPERT SYSTEMS IN BUILDING

M. L. Maher and J. S. Gero 195 Foreword

G. Carrara and G. Novembri 199 Knowledge assistants in the process of architectural design

U. Flemming 209 Knowledge representation and acquisition in the LOOS system

M. A. Rosenman 221 Application of expert systems to building design analysis and evaluation

P. M. Evans 235 Rule-based applications for checking standards compliance of structural members

J. H. Garrett Jr 241 Application of knowledge-based system techniques to standards representation and usage

T. C. Chang and C. W. Ibbs 253 PRIORITY RANKING—a fuzzy expert system for priority decision making in building construction resource scheduling

C. Zozaya-Gorostiza, C. Hendrickson and D. R. Rehak 269 A knowledge-intensive planner for construction projects

J. S. Gero 279 Bibliography of books on artificial intelligence with particular reference to expert systems and knowledge engineering

Vol. 25, No. 4

Z. A. Baghdadi and M. A. Rahman 285 The potential of cement kiln dust for the stabilization of dune sand in highway construction

D. C. Okpala 291 Palm kernel sheil as a lightweight aggregate in concrete

M. Kolokotroni and A. N. Young 297 Guidelines for bioclimatic housing design in Greece

J. L. M. Hensen 309 Literature review on thermal comfort in transient conditions

T. M. Chung and W. C. Tong 317 Thermal comfort study of young Chinese people in Hong Kong

G. K. Cook 329 Artificial lighting in classrooms—results of a lighting survey

S. Hayman 333 Fibre-optic photocells for daylighting model studies

G. L. Reusing and G. M. Bragg 339 A multi-chamber ventilation model with random parameters

H. Okuyama 349 System identification theory of the thermal network model and an application for multi-chamber airflow measurement

M. H. Sherman 365 Tracer-gas techniques for measuring ventilation in a single zone

M. G. Davies 375 An idealised model for room radiant exchange

D. J. Wilson and D. E. Kiel 379 Gravity driven counterflow through an open door in a sealed room

K. A. Andam 389 Variability in stochastic sustained and extraordinary load processes

Announcements 397 7th International Conference on Numerical Methods for Thermal Problems

Minisymposium on Outflow Boundary Conditions

7th International Conference on Numerical Methods in Laminar and Turbulent Flow

International Conference on Nonlinear Engineering Computations
